**Beneficiary's name**

**Pacifico Digital Explorations GmbH**

**Name and summary of the operation**

Market launch of the platform “raclette” – a privacy-compliant, flexible, and sustainable solution for digital infrastructure.

The project aims to successfully introduce the newly developed open-source framework to the market. The solution radically simplifies the development of digital platforms and portals by providing core functionalities—such as authentication, access control, and UI components—in a modular way.

The goal is to offer European companies a privacy-compliant, flexible, and sustainable solution for their digital infrastructure.
